

OUTPATIENT ULTRASOUND REFERRAL AGREEMENT

I understand that I am being referred to Crown Veterinary Specialists (“Crown Vet”) for a diagnostic procedure only. My primary veterinarian has requested the ultrasound examination. While pertinent information has been forwarded to Crown Vet, I understand that their doctors are **not** primary care providers for my pet and may not have as much information as my primary veterinarian. My veterinarian has informed me of the procedure and any associated risks. I understand that my pet will be shaved at the ultrasound site requested. While every effort will be made to provide a complete imaging examination, patient condition or attitude may dictate that the examination is discontinued at the discretion of doctors at Crown Vet. The doctors at Crown Vet and my primary veterinarian are working together to ensure the best possible care for my pet. I understand that I must return to my regular veterinarian to review examination results, as well as for any follow up consultations or conversations. **I understand that I will not be speaking with doctors at Crown Vet directly. I also understand that the Crown Vet doctor will do a preliminary review of my pet’s medical history and communicate that history to the Board-Certified Radiologist involved with the ultrasound. The Crown Vet doctor will contact my primary veterinarian with results, and my primary veterinarian and I will discuss those results.**

The costs due upon discharge are outlined below.

- Preliminary review of pet’s history/
Communication with Radiologist \$ 45.00
- Ultrasound Examination \$424.00 - \$750.00
